

LONGER PERFORMANCE FOR EVERYONE

PM51 ALLPERFORMER™

Product Description

Designed for you

Our PM51 Allperformer blades are a great choice for your tough cutting needs.

The PM51 Allperformer is an ideal blade for your tough steel and stainless-steel cutting applications. This efficient and reliable blade is great for workshop to industrial applications. The PM51 is up to 30% more durable and 50% higher chip resistance than M51.

The PM51 Allperformer bi-metal blade is very forgiving of bandsaw machines – whatever their age, automation, or style. Available in PFV and FV tooth profiles, 8° and 0° degree angles.

The PM51 Allperformer blade is made from Western European raw materials and manufactured in our factory in Åmål, Sweden. Quality and consistency are assured in conformance with our ISO 9001:2015 processes.

PM51 Allperformer – Performance for everyone!
